

Bear Proof Food Containers

THE GONZO BAG
Patent pending
Even dogs can't smell what's inside

You can trust the revolutionary **Gonzo Bag** to safely store and totally eliminate odor emissions from whatever you have stored inside the bag. The unique design, combining an activated charcoal filter with a double walled bag and reusable enclosure will allow you to store many odoriferous substances. Even dogs can't smell what's inside the bag! It has been tested and proven effective by Gonzo, a Malamute mix with a very large, sensitive nose! The Gonzo Bag is made in Humboldt County, CA, USA of the highest quality materials.

About Us

The odor eliminating Gonzo Bag was invented by Jeff Poel, an environmental scientist with over 25 year's experience and a Master's Degree in Toxicology from Oregon State University, 1996, with input from Brandon Roberts. Jeff is a life long surfer and SCUBA diver who still goes out on the big days, and Brandon is an accomplished kite boarder/instructor who loves flying on and over the water. Both men, are of course, dog lovers and like to hang out with The Great Gonzorhelli (Gonzo for short) whether working or playing in the cold and foggy, but beautiful Pacific Northwest. Gonzo is a 10 year old Malamute/Miniature Bull Terrier/Shar Pei mix who doesn't particularly like water, but revels in anything stinky (dead, rotting seal carcasses are a favorite find of his on the beach). He is happy doing nothing more than simply being with his master and best friend. And perhaps chasing the neighborhood cats, but we didn't tell you that!

All of us consider ourselves to be very lucky to be living here and to serve our wonderful customers.

The Gonzo Bag

- You can trust the revolutionary smell proof Gonzo Bag to safely store and totally eliminate odor emissions from whatever you have stored inside the bag. The unique design, combining an activated charcoal filter with a double walled bag and reusable enclosure will allow you to store many odoriferous substances, such as food, diapers, dog poop bags, herbs, and any smelly organic materials that you don't want to smell for weeks or months. You can use it to store food and keep it safe from bears and other animals while camping. You can put your used dog poop bags in it and carry them in your car to a disposal site without smelling poop. You can store and ship smelly items without fear of alarming odors or leaks. Even a dog can't smell what's inside! It has been tested and proven effective by Gonzo, a Malamute mix with a very large, sensitive nose!

Smell Eliminating Bags

- The Smell Proof Gonzo Bag! For only \$46.95 (large bag), \$31.95 (medium bag) and \$26.95 (small bag) + shipping and handling you get peace of mind. Even a dog can't smell what's inside! Bag dimensions are 12 inches wide by 24 inches tall when sealed for a large bag that holds up to 2.0 pounds and 11 inches wide and 8 inches tall for the medium bag. Volume is approximately 3 liters for the large bag and 1/2 liter (1/4 lb) for the medium bag. The small bag is 7 inches square and holds 1/4 liter (1.0 oz). The XL Custom Bag (\$99.95 + shipping and handling) measures 18 inches wide by 30 inches long and can hold up to 6 pounds.
- The revolutionary Gonzo Bag was created by an environmental scientist and a marketing design expert to make the storage and transport of almost any odoriferous substance a totally "smell free" experience. It utilizes a patent pending double-walled bag sandwich design with a layer of activated charcoal media in between the bags. The activated charcoal media will absorb 100% of any organic molecules that seep through the inner bag and trap them before they can escape to the atmosphere, where people, a dog, a bear, or any animal can smell them.
